For our Product Development in the area of Membrane Technologies | Evaporation Technology | Diagnostic Membranes at Sartorius Stedim Biotech GmbH we are looking for a Polymer Chemist | Technical Chemist (m|f|d) at our Göttingen location. In this role you will further develop our membrane products for diagnostic applications and provide technical support for our customers. At the interface of product development and product management you will actively contribute to the success of our products.

Sartorius is a leading international partner of biopharmaceutical research and the industry. In fiscal 2019, the company earned sales revenue of some 1.83 billion euros. At the end of 2019, more than 9,000 people were employed at the Group’s approximately 60 manufacturing and sales sites, serving customers around the globe. Sartorius is a dynamic organization suited to people who want to showcase skills, be recognized for expertise, while thriving in a vibrant and innovative environment.

About the job
- Collaboration in all Product Development activities for nitrocellulose membranes and products for diagnostic applications
- Product and application development, e.g. further development of membrane production processes, optimization of membrane structure and surface chemistry according to the user requirement specification of Lateral Flow Assays
- Further development of the understanding of the relationship between membrane features and sensitivity of diagnostic tests
- Technical customer support on site at the customer
- Collaboration in the development of market analyses or marketing concepts and documents
- Development of requirement profiles for our product development as well as documents for product descriptions
- Coordination of activities between customers, product development, marketing, sales, production, quality assurance and external development partners

About you
- PhD in the field of polymer chemistry, technical chemistry or comparable
- Ideally, first work experience with protein chemistry, membrane technologies and immunological test systems as well as a good technical understanding
- Strong interest in customer service and marketing
- Fluent in English and German
- Willingness to international business travel (30-40%)
- Strong communication and problem solving skills
- Ready to take responsibility
- Strong identification with our core values: sustainability, openness, enjoyment

Why work for us
- Genuine career development within a leading, progressive, international business
- Support for further learning and personal development
- Supportive working environment
